Hi all,

I am following up on the emails I sent last week —

I am looking for the current wastewater flow rate out of the Gold King Mine.

Can you please provide this today, as soon as possible? My story will run tomorrow. If not, I will have to write in the New York Times that the E.P.A. would not share this basic piece of information with the public.

The AP reports that the flow rate is 213 gallons/min.

Can you confirm?

Thank you.

Julie
